### ***Specification***

The disclosure is objected to because of the following informalities: the continuing data in the first sentence needs to be updated to include the patent number (i.e. 6,669,314). Appropriate correction is required.

### ***Claim Objections***

Claim 80 is objected to because of the following informalities: in line 17, "the" should be deleted. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 80 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 80, stating that the units are limited in height so that an average office worker may view contents inside the uppermost drawer is indefinite, since what constitutes an "average" worker is unascertainable. Furthermore, it is improper to define a claim with respect to a person's dimensions, since people come in all different shapes and sizes and what is "average" is relative. Also for claim 80, "the pod floors" (plural) lacks antecedent basis.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 80 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morcheles. Morcheles teaches a storage pod (Fig. 1) comprising: a generally rectangular pod floor (30), mobile storage units (31,32) movable along a length of the floor and having drawers (column 5, lines 20-26) openable along the direction of movement of the units and stationary storage units (33,34) with drawers (column 5, lines 20-26) positioned at the edges of the floor. For claim 80 (as best understood), Morcheles fails to teach that the storage units are limited in height so that the contents inside the uppermost drawer can be downwardly viewed. The examiner takes Official notice that file cabinets/storage units<sup>EU 4113104</sup> come in all different sizes. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the units of Morcheles by using smaller units therein, because of personnel preferences, to accommodate handicap workers, to make articles stored in the upper drawers more readily accessible, etc.
